Food Waste Processors

A New Order in the Food *Waste* Chain.

Cut Down your
Waste
Hauling
Cost
and
Save the
Environment!

Get ready for the **Green Change.**

Diposal of food waste has always been a menace for our environment. It is now becoming a legal issue in many states with the new EPA regulations regarding biosolid risks in organic waste processing.

Find out how **RecycleTech's Food Waste Processors** can provide solutions for this smelly, expensive problem.

FD-200 Food Waste Processor

<i>Process Method :</i>	Disintegration using Micro Organisms
<i>Process Capacity :</i>	230 lbs per day (700 lbs & 1100 lbs models are available)
<i>Dimensions :</i>	33.5 W x 51 L x 41 H
<i>Weight :</i>	1,300 lbs
<i>Vanishment Rate :</i>	98%
<i>Run Cycle :</i>	24 hours
<i>Power Requirements :</i>	220 Vac 60 Hz / 5 KW

Food Waste Processing with Micro Organism Disintegration

Operating Temperature:
5 to 104° F

Microbial enzyme is added
to the process base.

Mixture is agitated with
twin screws.

- No contaminating discharges
- Fully automated operation
- Low power consumption

- Virtually odorless emissions
- Wide range of processible food types
- Can be used indoors or outdoors
