Daniel Chung, President
Recycle Tech
1010 Hoyt Avenue
Ridgefield, NJ 07657

Dear Mr. Chung:

I wanted to thank you for manufacturing the equipment that enabled us to eliminate one of our biggest waste challenges that we have dealt with for the last 9 years. We have investigated various ways of handling our 8.5 cubic yards of EPS waste generated per day and found that the Recycle Tech equipment offered the best overall solution.

The Model XT 200 equipment has allowed us to process our EPS waste in a most efficient manner and has reduced our total waste volume dramatically. By reducing the overall waste handling fees, it enabled our company to justify the purchase of the equipment with a payback period of one year. In addition, Recycle Tech's offer to purchase the EPS ingots (the concentrated material processed by your equipment) will essentially eliminate this waste product entirely from our facility and the area landfill.

We have been using this equipment for over 6 months now and have not experienced any problems. We believe that the overall design of the equipment will provide us with years of continued service.

Thank you again for providing a means to solve our EPS waste problem.

Sincerely,

James K. Trumbauer
